

3300 Automatic Counterfeit Detector

Ultimate Protection for Your Cash

The Cassida 3300 is a fully automatic counterfeit detector that catches 100% of counterfeits, including bleached bills (\$100, \$50, \$20 counterfeits printed on real \$1 or \$5 bills).

- Counterfeit Shield Guarantee**

Our state of the art technology will protect you against any counterfeits made anywhere in the world. We back that promise with our Counterfeit Shield Guarantee: We will reimburse you the full face value of the counterfeit bill should your detector accept it as genuine. See below for more information.
- Easy to use**

The 3300 does not require users to have bill authentication knowledge. It instantly recognizes the bill's denomination, verifies authenticity, and displays detailed information on the large LCD screen.
- Compact size**

The 3300 is the smallest detector on the market, allowing it to fit almost anywhere. Users can choose to eject authenticated bills through either front or rear slots, further reducing its operating footprint.
- Fast**

The Cassida 3300 accurately recognizes denominations and authenticates bills in less than one second.

Spots all counterfeits, including washed and reprinted bills.

Easy-to-read LCD screen
